Advisory Action

Applicant's arguments filed 1/08/2010 have been fully considered but are not persuasive. Applicant's proposed amendments have not been entered because they raise new issues that would require further search and/or consideration. Specifically, the limitation has not previously been considered during prosecution. It is also not clear that the limitation has written description support as applicant has not provided any citation supporting the amendment and a word search of the specification did not clearly demonstrate the limitation is supported by the original disclosure. The amendment also has not been entered because it is not deemed to place the application in better form for appeal by materially reducing the issues on appeal for the reasons stated above.

Applicant's arguments have been fully considered but are moot since the arguments are contingent upon the entry of the non-entered amendment. Furthermore, the arguments are not commensurate in scope with the proposed claim since applicant's discussion is limited to injections in a time of less than 10sec and because the photographs would need to be filed as part of declaration to be considered.

With respect to Kallenbach, applicant argues the resins are cured at temperatures of 315-470C whereas the preferred injection temperatures of the claimed invention are much lower, in the neighborhood of 280-320C. Said argument is not persuasive because it is not commensurate in scope with the claimed invention. The injection temperature is not claimed.

Applicant also argues the reaction mechanism is different between the prior art and the claimed invention. Said argument is not persuasive because it is not

commensurate with the claim language (no reaction mechanism is claimed) and applicant's proposed reaction mechanism is not supported by the original disclosure.

For the reasons noted above, the rejections are maintained.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to KEVIN R. KRUER whose telephone number is (571)272-1510. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Callie Shosho can be reached on 571-272-1123. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
